

City of Gallup Water Conservation
High-Efficiency Clothes Washer (HEW)
Residential Rebate PROGRAM POLICY

ABOUT THE PROGRAM

This program offers a \$100 financial incentive for City of Gallup residential water customers who choose to purchase a **High-Efficiency Clothes Washer (HEW)** in place of an older standard top-loading model. Conventional residential clothes washers use approximately 50 gallons of water cycle while high efficiency washers, or front-loading washers, use as little as 16 gallons per load. These clothes washers use an average 50% less water and energy annually. By using less water and energy, you can save money on water bills and water heating costs throughout the year. In addition, high efficiency clothes washers use less detergent and may also result in reduced drying time. This rebate will be in effect until December 30, 2012 unless action to extend this policy is taken by the Gallup City Council prior to that date.

WHO IS ELIGIBLE

City of Gallup utility customers who meet the program qualifications and requirements stated below. Commercial laundromats are not eligible.
